

Postgres container backup

```
/usr/bin/podman exec db pg_dumpall -U postgres -c | zstdmt >
/var/backup/db/manual/${hostname -f}_${date +%F}_${date +%s}.sql.zst
```

Postgres container restore

```
zstdcat /var/backup/db/manual/dump.sql.zst | /usr/bin/podman exec -i db
psql -U postgres --
```
